

ISO 27001:2022

Information Security, Cybersecurity, and Privacy Protection

#### **SELF ASSESSMENT CHECKLIST**

See how it works

#### **CONTEXT**

	THE ORGANISATION  Have we determined internal and external issues that will impact on o security management system?	ur information
	Have we determined which stakeholder requirements are addressed t information security management system?	hrough the
	Interested Parties  Have we determined what internal and external interested parties are information security management system and what their requirement	
	Scope Have we determined the boundaries of the information security management system and documented the scope?	
	Leadership	
	Leadership and Commitment  Can we demonstrate top management is providing leadership and commitment to the information security management system?	
	Information Security Policy Have we documented an information security policy that is communicated and available?	
	Roles and Responsibilities  Are roles and responsibilities for information security communicated and understood?	

## **Planning**

	Risks and Opportunities  Have we determined the information security risks and opportunities related to our organisation?	
	Have we implemented a documented information security risk assessment process?	
	Statement of Applicability  Have we documented a risk treatment plan and Statement of Applicability with regard to controls?	
	Information Security Objectives Have we established information security objectives?	
	Are our information security objectives available as documented information?	
	Do we monitor, measure, and communicate them?	
	Do we have plans to achieve them?	
	Have we maintained records?	
	Planning of changes Are changes to the information security management system carried out in a manner that is planned?	
49	COMPASS	

# **Support**

Resources  Have we determined and ensured necessary resources are in place for the information security management system?
Competence Do we ensure competence of personnel?
Do we maintain records?
Awareness Have we ensured that personnel are aware of our policy, relevant objectives, and their responsibilities?
Communication  Have we determined processes for internal and external communication relevant to information security?
Control of Documents  Do we ensure documents and records are controlled?
Operations
Operational Planning and Control  Have we established and maintained procedures to meet the requirements of the information security management system?
Have we established criteria for processes, and do we maintain control of the processes in accordance with these criteria?
Risk Assessment  Do we assess risk at planned intervals and when significant changes occur, and do we maintain records?
Risk Treatment
Have we implemented risk treatment plans, and do we maintain records?

## **Performance Evaluation**

**Monitoring & Measurement** 

Do we monitor things such as processes, operational controls, access, usage, change?
Do we measure things such as KPIs, performance against targets?
Do we analyse this information and maintain records?
Internal Audit  Do we plan and conduct internal audits to ensure the information security system conforms to requirements and is implemented effectively?  Do we maintain records?
Management Review  Does our top management review our information security management system at planned intervals?
Do we maintain records?
Do we include decisions relating to continual improvement and any need for changes in the documented results of the management reviews?

### **Improvement**

#### **Continual Improvement**

Do we continually	v improve the	information s	security mana	gement system?

#### **Nonconformity and Corrective Action**

l D	o we take control of	, correct and deal with	the consequences	of nonconf	formities raised?
-----	----------------------	-------------------------	------------------	------------	-------------------

Do we review and determine the root cause of the nonconformity?

Do we review the effectiveness of corrective action taken and use this knowledge to make

changes or improvements to the information security management system?

Do we maintain records?

	ANNEX A					
5 (	5 Organisational Controls					
5.1 Policies for information	A set of information security policies relevant to					
security	interested parties					
5.2 Information security roles and responsibilities	Defining and allocating roles and responsibilities within the information security management system as appropriate and in accordance with organisational needs					
5.3 Segregation of duties	Conflicting duties and areas of responsibility are handled separately from each other					
5.4 Management responsibilities	Management ensures all personnel are applying information security in accordance with the established policies and procedures of the organisation					
5.5 Contact with authorities	Contact with relevant authorities is established and maintained by the organisation					
5.6 Contact with special interest groups	Contact with special interest groups, specialist security forums and/or professional associations is established and maintained by the organisation					
5.7 Threat intelligence	The organisation collects and analyses information relating to information security threats					
5.8 Information security in	Information security is integrated into management					
project management	of projects					
5.9 Inventory of information and other associated assets	Development and maintenance of an inventory of information and other associated assets, including owners					
5.10 Acceptable use of information and other associated assets	Defined, documented, and implemented rules for the acceptable use and procedures for handling information and other associated assets					
5.11 Return of assets	Assets belonging to the organisation in the possession of personnel and other interested parties are returned to the organisation upon change to or termination of their employment, contract, or agreement					
5.12 Classification of information	Information is classified based on confidentiality, integrity, availability, and relevant interested party requirements					
5.13 Labelling of information	A set of defined, documented, and implemented procedures for labeling of information aligned with the information classification scheme					
5.14 Information transfer	Defined and implemented rules, procedures, or agreements for all types of transfer facilities within					

	2770-00
	the organisation as well as between the organisation
	and other parties
5.15 Access control	Defined and documented rules to control physical
	and logical access to information
5.16 Identity management	Management of identities for their full life cycle
5.17 Authentication information	Allocation and management of authentication
	information, such as usernames and passwords, is
	controlled by a management process that includes
	advising personnel on appropriate handling of
	authentication information
5.18 Access rights	Provisioning, reviewing, and monitoring of access
	rights to information and other assets in accordance
	with the relevant policy and rules for access control
5.19 Information security in	Defined and implemented processes and procedures
supplier relationships	for managing information security risks associated
supplier relationships	with the use of supplier products or services
5.20 Addressing information	Establishing and agreeing upon information security
_	requirements in supplier relationships
security within supplier	
agreements	Defined and involvemented are access and are access.
5.21 Managing information	Defined and implemented processes and procedures
security in the information and	to manage information security risks associated with
communication technology (ICT)	ICT products and services supply chain
supply chain	
5.22 Monitoring, review and	Regular monitoring, review, and evaluation of
change management of supplier	changes in supplier information security practices
services	
5.23 Information security for use	Establishing processes for the acquisition, use,
of cloud services	management, and exit from cloud services in
	accordance with the organisational information
	security requirements
5.24 Information security incident	Defined, implemented, and communicated processes
management planning and	as well as roles and responsibilities for management
preparation	of an information security incident
5.25 Assessment and decision on	Assessing information security events to determine if
information security events	they are to be categorised as information security
	incidents
5.26 Response to information	Documented and implemented procedures on
security incidents	appropriate response to information security
	incidents
5.27 Learning from information	Strengthening and improving controls based on
security incidents	knowledge gained from information security
	incidents
5.28 Collection of evidence	Establishing and implementing procedures for
	identification, collection, acquisition, and
	preservation of evidence relating to information
	security events

5.29 Information security during	Developing a plan to maintain information security at
disruption	an appropriate level during disruption
5.30 ICT readiness for business	Implementing processes so the organisation can
continuity	continue operations as usual in case of a disruption
	that affects ICT
5.31 Legal, statutory, regulatory,	Identifying, documenting and keeping up to date with
and contractual requirements	legal, statutory, regulatory and contractual
·	requirements relevant to information security
5.32 Intellectual property rights	Implementing appropriate procedures to protect
1 1 , 3	intellectual property rights
5.33 Protection of records	Storing records such that they are protected from
	loss, destruction, falsification, unauthorised access,
	and unauthorised release
5.34 Privacy and protection of	Identifying and meeting relevant requirements
personal identifiable information	regarding preservation of privacy and protection of
(PII)	PII
5.35 Independent review of	Independent reviews at planned intervals, or when
information security	significant changes occur, of the organisational
intermediation security	approach to managing information security and its
	implementation including people, processes, and
	technologies
5.36 Compliance with policies,	Regularly reviewing organisational compliance with
rules, and standards for	its information security policy and topic-specific
information security	policies, rules, and standards
5.37 Documented operating	Documented procedures for information processing
procedures	facilities
procedures	6 People Controls
6.1 Screening	Conducting background checks on all candidates prior
0.1 36/66/11/19	to joining the organisation as well as on an ongoing
	to joining the organisation as wen as on an ongoing
	hasis
6.2 Terms and conditions of	Documenting both personnel and organisational
6.2 Terms and conditions of	Documenting both personnel and organisational
6.2 Terms and conditions of employment	Documenting both personnel and organisational responsibilities for information security in
employment	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements
employment  6.3 Information security	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and
employment  6.3 Information security awareness, education, and	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate
employment  6.3 Information security	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and
employment  6.3 Information security awareness, education, and	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's
employment  6.3 Information security awareness, education, and	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies,
employment  6.3 Information security awareness, education, and training	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job
employment  6.3 Information security awareness, education, and	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take
employment  6.3 Information security awareness, education, and training	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant
employment  6.3 Information security awareness, education, and training	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant interested parties who violate information security
employment  6.3 Information security awareness, education, and training  6.4 Disciplinary process	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant interested parties who violate information security policies
employment  6.3 Information security awareness, education, and training  6.4 Disciplinary process  6.5 Responsibilities after	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant interested parties who violate information security policies  Defining, enforcing, and communicating to relevant
employment  6.3 Information security awareness, education, and training  6.4 Disciplinary process  6.5 Responsibilities after termination or change of	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant interested parties who violate information security policies  Defining, enforcing, and communicating to relevant personnel and interested parties the responsibilities
employment  6.3 Information security awareness, education, and training  6.4 Disciplinary process  6.5 Responsibilities after	Documenting both personnel and organisational responsibilities for information security in employment contractual agreements  Regularly providing personnel of the organisation and other relevant interested parties appropriate information security awareness, education, and training as well as updates of the organisation's information security policy, topic-specific policies, and procedures as appropriate to their job  Formalising and communicating a process to take actions against personnel and other relevant interested parties who violate information security policies  Defining, enforcing, and communicating to relevant

ISO 27001:2022 Information Technology	www.cas.com.au	1800 501 141	STATE OF THE PARTY
			To the state of th

6.6 Confidentiality or non-	Documenting and regularly reviewing confidentiality				
disclosure agreements	or non-disclosure agreements signed by personnel				
	and other relevant parties as per organisational				
	needs				
6.7 Remote working	Implementing security measures when personnel are				
	working remotely such that information accessed,				
	processed, or stored outside the organisation's				
	premises is protected				
6.8 Information security event	Providing a method by which personnel can report				
reporting	observed or suspected information security events				
	through appropriate channels and in a timely manner				
	7 Physical Controls				
7.1 Physical security perimeters	Defining security perimeters to protect areas that				
	contain information and other associated assets				
7.2 Physical entry	Protecting secure areas with appropriate entry				
	controls and access points				
7.3 Securing offices, rooms, and	Designing and implementing physical security for				
facilities	offices, rooms, and facilities				
7.4 Physical security monitoring	Continuous monitoring of premises for unauthorised				
, , , , ,	physical access				
7.5 Protecting against physical	Designing and implementing infrastructure to protect				
and environmental threats	against physical and environmental threats such as				
	natural disasters				
7.6 Working in secure areas	Designing and implementing security measures for				
	working in secure areas				
7.7 Clear desk and clear screen	Defining and enforcing clear desk rules for papers and				
	removable storage, as well as clear screen rules for				
	information processing facilities				
7.8 Equipment siting and	Securely siting and protecting equipment				
protection					
7.9 Security of assets off-	Protecting assets that are stored off-site				
premises					
7.10 Storage media	Managing storage media through their life cycle of				
	acquisition, use, transportation, and disposal in				
	accordance with the organisation's classification				
	scheme and handling requirements				
7.11 Supporting utilities	Protecting information processing facilities from				
	power failures and other disruptions				
7.12 Cabling security	Protecting cables carrying power, data, or supporting				
	information services from interception, interference,				
	or damage				
7.13 Equipment maintenance	Maintaining equipment correctly to ensure the				
	availability, integrity, and confidentiality of				
	information				
7.14 Secure disposal or re-use of	Verifying items of equipment containing storage				
equipment .	media to ensure that any sensitive data and licensed

	software has been removed or securely overwritten	
prior to disposal or re-use		
	Technological Controls	
8.1 User end point devices	Protecting information stored on, processed by, or	
	accessible via user end point devices	
8.2 Privileged access rights	Restricting and managing the use or privileged access	
	rights	
8.3 Information access restriction	Restricting access to information and other	
	associated assets in accordance with the	
	organisation's access control policy	
8.4 Access to source code	Managing read and write access to source code,	
	development tools and software libraries	
8.5 Secure authentication	Implementing secure authentication technologies	
	and procedures based on access restrictions and the	
	organisation's access control policy	
8.6 Capacity management	Monitoring and adjusting the use of resources in line	
	with current and expected capacity requirements	
8.7 Protection against malware	Implementing malware protection supported by user	
	awareness	
8.8 Management of technical	Obtaining information about technical vulnerabilities,	
vulnerabilities	evaluating the organisation's exposure to such	
	vulnerabilities, and taking appropriate measures	
8.9 Configuration management	Establishing, documenting, implementing,	
	monitoring, and reviewing configurations including	
	security configurations of hardware, software,	
	services, and networks	
8.10 Information deletion	Deleting information stored in information systems,	
	devices, or other storage media when the	
	information is no longer required	
8.11 Data masking	Masking data as appropriate and in accordance with	
	the organisation's access control policy and other	
	relevant legislation	
8.12 Data leakage prevention	Applying measures to systems, networks, and any	
	other devices that process, store, or transmit	
	sensitive data to prevent leakage of data	
8.13 Information backup	Maintaining backup copies of information, software,	
	and systems	
8.14 Redundancy of information	Implementing sufficient redundancy in information	
processing facilities	processing systems to meet availability requirements	
8.15 Logging	Producing, storing, protecting, and analysing logs that	
	record activities, exceptions, faults, and other	
	relevant events	
8.16 Monitoring activities	Monitoring networks, systems, and applications for	
	unusual behaviour and taking appropriate actions to	
	evaluate potential for information security events

	001 INFO	
8.17 Clock synchronisation	Synchronising clocks of information processing	
0.40 Has of outside and 1999	systems to approve time sources	
8.18 Use of privileged utility	Restricting the use of utility programs that can	
programs	override system and application controls	
8.19 Installation of software on	Implementing procedures to securely manage	
operational systems	installation of software on operational systems	
8.20 Networks security	Securing, managing, and controlling networks and	
	network devices to protect information in systems	
	and applications	
8.21 Security of network services	Implementing and monitoring security mechanisms,	
	service levels, and service requirements of network	
	services	
8.22 Segregation of networks	Segregating groups of information services, users,	
	and information systems in the organisation's	
	networks	
8.23 Web filtering	Managing access to external websites to reduce	
	exposure to malicious content	
8.24 Use of cryptography	Defining and implementing rules for effective use of	
	cryptography, including cryptographic key	
	management	
8.25 Secure development life	Establishing and applying rules for the secure	
cycle	development of software and systems	
8.26 Application security	Identifying information security requirements when	
requirements	developing or acquiring applications	
8.27 Secure system architecture	Establishing, documenting, maintaining, and applying	
and engineering principles	principles for engineering secure systems to all	
	information system development activities	
8.28 Secure coding	Applying secure coding principles to software	
_	development	
8.29 Security testing in	Defining and implementing processes for security	
development and acceptance	testing within the development life cycle	
8.30 Outsourced development	Monitoring and reviewing development activities that	
· ·	have been outsourced	
8.31 Separation of development,	Secure, separate environments for development,	
test, and production	testing, and production	
environments		
8.32 Change management	Procedures implemented to manage changes to	
	information processing facilities and information	
	systems	
8.33 Test information	Appropriate selection, protection, and management	
	of information used for testing	
8.34 Protection of information	Planning and appropriately managing audit tests and	
systems during audit testing	other assurance activities of operational systems
